EXPERIENCE

Farfetch | Porto Portugal | Team Leader Software Engineer since 11/2018

I started as a Sr. Software Engineer developing and maintaining distributed services for a wide platform where my context is related to Authentication and user management, and since 2022 as a Team Leader managing roadmap, unlocking the team in cases of technical blockers or requirements doubts.

Main Tasks

- Technical requirements research/align with stakeholders
- Manage agile - Flow/planning / daily / refinement
- Support development
- Support architecture decisions/directions
- Review the code of peers
- Develop/maintain and deploy features

Technology/topics

Dotnet, Kubernetes, Azure, docker, Cassandra, Kafka, elastic search, MongoDB, identity server, agile, OAuth 2, open connect, JIRA, Scrum, Kanban, REST, Messaging

IHARA | Sorocaba SP — Software Architect | 06/2014 - 04/2018

Develop and maintain a custom ERP 60% based in PowerBuilder and 40% in ASP.NET, updating ERP to a new architecture based on distributed computing with dot net/core, SQL, Rabbitmq, and docker.

Main Tasks

- Technical requirements research/align with stakeholders
- Development of features and or fixes on the current base code
- Redesign architecture of legacy ERP to distributed services
- Develop/maintain and deploy features
- Training of users

Technology/topics

Dotnet, oracle, rabbit-mq, identity server, agile, IIS, docker, REST, Messaging

Smyowl | Sorocaba SP | Systems Analyst 03/2013 - 07/2014

Develop and maintain APIs for Mobile Games made in Unity3D and Multi-Platform Xamarin Apps, Api's based on distributed Systems, hosted in Azure with multiple instances.

Main Tasks
